EPILEPSY WARNING

Please read the manual and particularly this paragraph, before using this video game system or allowing your children to use it. A responsible adult should go through with any minors, the operator instructions of the Dreamcast before allowing play to take place. Some people are susceptible to epileptic seizures or loss of consciousness when exposed to certain flashing lights or light patterns in everyday life. Such people may have a seizure while watching certain television images or playing certain video games. This may happen even if the person has no medical history of epilepsy, or has never had an epileptic seizure. Certain conditions may induce undetected epileptic symptoms even in persons who have no history of seizures or epilepsy. If you or anyone in your family have ever had symptoms related to epilepsy (seizures or loss of consciousness) when exposed to flashing lights, consult your doctor prior to playing.

We advise that parents should monitor the use of video games by their children. If you or your child experience any of the following symptoms: dizziness, blurred vision, eye or muscle twitches, loss of consciousness, disorientation, any involuntary movement or convulsion, IMMEDIATELY discontinue use and consult your doctor.

For your health

- Sit away from the television screen, as far as the length of the Controller cable allows. We advise that you sit a minimum of 6.5 feet (about 2 meters) away from the television screen.
- Preferably, the game should be played on a small television screen.
- Avoid playing if you are tired or have not had much sleep.
- Make sure that the room in which you are playing is well lit.
- Rest for at least 10 minutes per hour while playing any video game.

GETTING STARTED

This GD-ROM can only be used with the Dreamcast System. Do not attempt to play this GD-Rom on any other CD player - doing so may damage the headphones and speakers.

1. Set up your Dreamcast system by following the instructions in your Dreamcast System Instruction manual. Plug in Control pad 1. For 2-4 player games, plug in pads 2-4 also.
2. Place the Dreamcast GD-ROM, label side up, in the well of the CD tray and close the lid.
3. Press the Power Button to load the game. The game starts after the Dreamcast logo screen. If nothing appears, turn the system OFF and make sure it is set up correctly.
4. If you wish to stop a game in progress or the game ends and you want to restart, press A, B, X, Y and Start simultaneously to return to the game title screen. Press A, B, X, Y and Start simultaneously again to return to the Dreamcast control panel.

Important: Your Dreamcast GD-ROM contains a security code that allows the disc to be read. Be sure to keep the disc clean and handle it carefully. If your Dreamcast System has trouble reading the disc, remove the disc and wipe it carefully, starting from the centre of the disc and wiping straight out towards the edge.

HANDLING YOUR DREAMCAST GD-ROM

- The Dreamcast GD-ROM is intended for use exclusively with the Dreamcast System.
- Be sure to keep the surface of the GD-ROM free of dirt and scratches.
- Do not leave it in direct sunlight or near a radiator or other sources of heat.

Serve

Set a serve position with ↑↓←→, and press Ⓐ, Ⓑ or Ⓧ to toss the ball. When the player tosses the ball, a serve gauge will be displayed beside the player. Press Ⓐ, Ⓑ or Ⓧ with good timing because the serve becomes faster as the serve gauge gets closer to "MAX". Press Ⓐ to make a straight serve, and press Ⓑ/Ⓧ to make a slice serve.

Vibration Pack™

When using a Vibration Pack (sold separately), make sure to connect it to Expansion Socket 2 of the Dreamcast Controller. A Vibration Pack cannot be used with an Arcade Stick.

VIRTUA TENNIS 2
Ball Direction

Run to the ball and press Ⓐ/Ⓑ/Ⓧ to hit the ball back to the
opponent's court (see below for shot type). After pressing
that button and before hitting the ball back to the opponent,
press ⬆⬇⬅➡ to select the direction to hit the ball. Use ⬅➡
to aim left or right, and use ⬆⬇ to aim to the front or back.

Shot Strength

You can hit the ball harder (faster) if you run to the ball fast enough to get ready for the shot. On
the other hand, if you barely reach the ball and are not ready for the shot, you will not hit it hard.
The strength of the shot changes with the height you hit the ball at (shot point). It is difficult to
hit the ball back hard if the ball has a low shot point, for example right after it bounced. The
higher the shot point, the harder the shot becomes.

Shot Type

A topspin shot (Ⓐ) is a regular shot with a forward spin (vertical spin). The ball moves fast,
but its trajectory is high and bounces high. A slice shot (Ⓑ) has backspin. The ball moves
slowly as if floating in the air. Its trajectory is low and it bounces low. A lob shot
(Ⓧ/Ⓐ+Ⓑ) has a high trajectory and goes over the opponent's head. It is used to hit the
ball behind the opponent when the opponent is at the net.
Smash

Wait for a high-trajectory ball to come down, and press
Ⓐ/Ⓑ to hit a smash. Press **⬆⬇⬅➡** to control the ball path
in the same way as regular shots.
Drop Shot

Press **⬆⬇** after pressing **Ⓑ** to aim at an area near the net.
You can make a drop shot that falls near the net. It is
effective when the opponent is at the baseline.

Instruction to COM partner

Give a position instruction to your COM partner in doubles
matches. Press **Ⓛ/Ⓡ** (**②**) to switch instructions between the
BASELINE / NORMAL / NET PLAY displayed at the top
of the screen.

GAME MODES

There are 4 modes
to choose from

This section explains the contents and operations of the " TOURNAMENT", "EXHIBITION", "WORLD TOUR" and "OPTIONS" modes.

TOURNAMENT [for 1 to 4 players]

Try to win all 5 stages of singles matches and 3 stages of doubles matches. Press the START button of another controller during the game to jump into the game [➡P.25].

⬤ Selecting a match system

Select "TOURNAMENT" in the Menu Screen to display the "SINGLES / DOUBLES" menu.

⬤ Selecting a player

Select a player from the 16 featured male and female players. Select with the D-Pad, and confirm with Ⓐ. To use a player created/trained in WORLD TOUR mode, select "VM" shown on the right. "VM" can only be selected when a player was created in WORLD TOUR mode and the memory card is inserted. Since the non-1P controller can also use a customised player if a memory card with WORLD TOUR data is inserted into Expansion Socket 1 of that controller, you can play your customised player with or against your friend's.

○ Starting the match

The match starts after selecting and confirming the player and the opponent. Try to win the series of matches. Press the START button during the game to display the Pause Menu (➡P.23). To continue the game after losing, select "CONTINUE" and press Ⓐ. To return to the Menu Screen, select and confirm "END".

"Jumping into the game"

In both "TOURNAMENT" and "EXHIBITION" modes, other players can "jump into the game" by pressing the START button of an unused Dreamcast Controller. The START button can be pressed during player selection or during the game. It works as follows:

Select Player	Coin Toss	Start the Game
First, select a player. Although a male player cannot play against a female player, it is possible to make a mixed pair in doubles.	Toss a coin to decide who serves. There are no controller operations here.	The game starts after deciding who serves. Up to becoming a 4P game, it is possible to "jump into the game" even after the match has started.

VIRTUA TENNIS 2

EXHIBITION [for 1 to 4 players]

A mode for challenge matches where game settings can be freely assigned. There is only one match in this mode. Here, too, it is possible to "jump into the match" by pressing the START button of another controller during the game (➡P.25).

⭕ Selecting a match system

Select "EXHIBITION" in the Menu Screen to display the "SINGLES / DOUBLES" menu just as in the TOURNAMENT mode.

⭕ Setting the player position

Set an initial player position regardless of whether it is a singles or a doubles match. Use ⬆⬇⬅➡ on the D-Pad to select a position, and confirm with Ⓐ. Press the START button on the other controllers to play a game with 2 to 4 players. Each player selects and confirms their position here, too.

⭕ Setting rules

Set various match rules. Select the rule with ⬆⬇ of the D-Pad, and change with ⬅➡. After setting all rules, move the cursor to "OK," and press Ⓐ.

GAME COUNT	Number of games to win one match (1- 6 games).
TIE BREAK	Switch on/off the tiebreaker rules.
COM LEVEL	Level of COM opponent (select one from EASY, NORMAL, HARD, and VERY HARD).

Selecting players

Just like in the TOURNAMENT mode, select one of 16 male and female players to control. When you have made your selection, assign opposing COM players.

Selecting a stage

Select a stage on which to play the match. Only 5 stages are available at the beginning. As the game proceeds, you can purchase stages at a shop in "WORLD TOUR" mode and then select more stages for play here.

Starting the match

Start the match after selecting the stage. Press the START button during the game to display the Pause Menu (➡ P.23).

About tiebreak in "Virtua Tennis 2"

An extra game will be added if no player wins by 2 or more games within the set number of games. After the players have won the same number of games, the last game will be a tiebreak. In the tiebreak, points will be counted as numbers (e.g. 5-6), and the first player to win by 2 while gaining 7 or more points is the victor. Each player serves twice in a row. This rule is slightly different from rules of actual tennis.

VIRTUA TENNIS 2

WORLD TOUR [for 1 player]

Create one male player and one female player, and join the World Tour. Train the created players through mini-games, and enter tournaments held all around the globe to compete for the #1 world ranking.

⭕ Starting the WORLD TOUR

When selecting the "WORLD TOUR" mode for the first time, the games start from step 2 below. If there is "WORLD TOUR" saved data, a menu will be displayed. Select "NEW GAME" to start a new game and select "CONTINUE" to continue a saved game.

⭕ Creating characters

Create one male player and one female player. Set the following 5 items first for the male player. Select the items to be set with ⬆⬇ of the D-Pad, and proceed to each Setting Screen by pressing Ⓐ. After setting them, move the cursor to " FINISH," and press Ⓐ. Next, create the female player in the same way. After setting up two characters, a screen shown on the right will be displayed.
